

Localized diagnostic evidence: one success and one audited failure

(a)

Successful exact localization
local_fragment_shift | severity 16.0

Reference

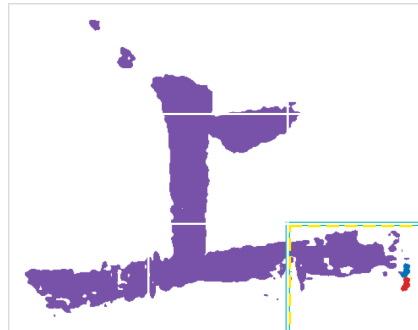

Perturbed candidate

Alignment overlay

Localized evidence

Returned structured evidence

Frozen diagnostic output

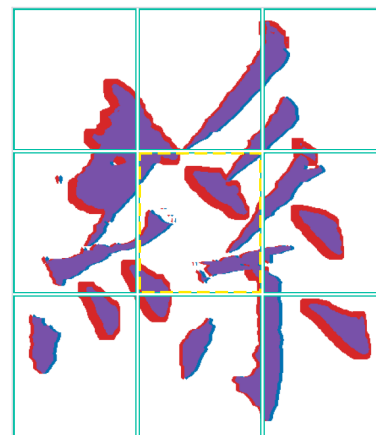

1. local_direction_structure | vec4 | missing_reference_structure | r2c2

Truth channel: vec4
Truth type: None
Truth cells: r2c2

Exact region: correct

(b)

Representative metric failure: multi-cell truth
direction_width_dilate | severity 6.0

Frozen diagnostic output

1. local_direction_structure | vec4 | extra_user_structure | r1c1
2. layout_ink_scale

Truth channel: vec4
Truth type: extra_user_structure
Truth cells: r0c0, r0c1, r0c2, r1c0, r1c1, r1c2, r2c0, r2c1, r2c2

Exact-one-cell metric: failed

■ overlap

■ missing reference

■ extra candidate

green solid = truth cells; yellow dashed = predicted cell

The second case is not concealed: the returned cell overlaps the multi-cell change, but the frozen exact-one-cell metric records failure.
