

Reference-conditioned structural assessment separates perception, alignment, and diagnosis

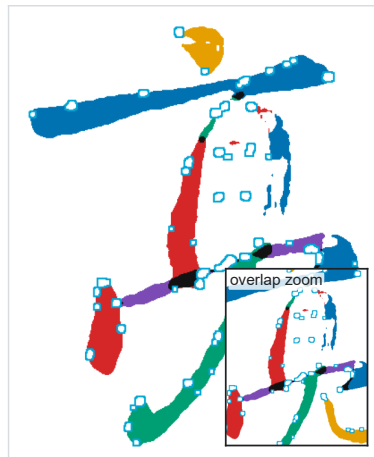

(a) Same character, distinct structure

Ouyang Xun reference

Wang Xizhi candidate

(b) Overlapping stroke parsing

black pixels activate >1 direction channel

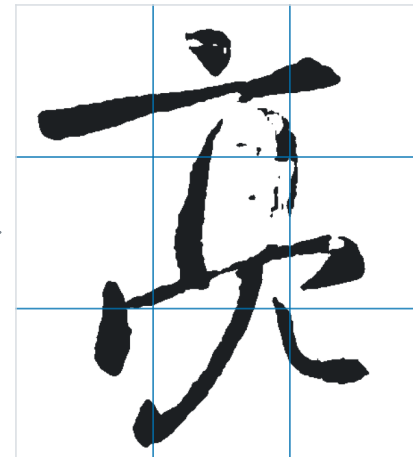

(c) Constrained global alignment

s=1.20, r=3 deg

■ overlap ■ missing ■ extra

(d) Spatial + directional evidence

polar 0.64 | grid 0.76 | projection 0.70

(e)

Auditable output

Production score: 12.9/100

Weakest direction: vec4

Direction Dice: 0.00

Ink IoU: 0.20

Endpoint F1 (3 px): 0.07

Return: six masks, transform, missing/extra regions, and bounded evidence for text realization.
